Gepäcksysteme

Now in black !

Extremely durable. Flexible and unbreakable in use. We guarantee 100% water resistance for the top loading concept of the side box (37 l capacity) and the top case (42 l capacity). All locks have a cylinder locking mechanism. The Gobi bags are made of a double-skinned, coloured shock-resistant artificial material which is extremely robust, water-proof and may absorb any shock without any consequences for your journey. There is another further hidden advantage: the space between the internal and external shell offers room for approx. 3.5 l liquid.

With the use of a tap, the contents of this "mobile water reservoir" can be removed in a user-friendly manner.
